### Operative:
Two different restorative procedures from a choice of the following four:
1. Direct Restoration
   - Posterior Class II Amalgam
2. Direct Restoration
   - Posterior Class II Composite
3. Direct Restoration
   - Anterior Class III Composite
4. Indirect Restoration
   - Posterior Class II Gold

### Periodontal Treatment:
Perform scaling and root planning on one or two quadrants

### Endodontics:
4-hour timed exam which consist of endodontic treatment on two extracted teeth: one anterior tooth and one multi-canal posterior tooth. The teeth are mounted in arches and treatment is done with arches mounted in a manikin.

### Patient Assessment & Treatment Planning (PATP):
A case history *(including radiographs, photos, charting).*
Medical history of one patient is provided. Using the information provided, you have one hour to develop a treatment plan.

**Perodontal Assessment, Diagnosis and Prosthodontics:**
Two computerized simulation exams:

1. Periodontal
2. Prosthodontics

Each exam consists of 50 multiple choice questions. Time allowed for the two exams, including a tutorial, is three hours.

**Testing Requirements:**
All Five Sections must be taken on the First Attempt. Failure of 1-2 sections allows the candidate to retake just the failed sections. Failure of 3 or more sections requires retaking the entire examination.
